Welcome

Thank you for purchasing a MultiConnect® Conduit™. The Conduit™ is a programmable gateway that uses an open Linux development environment to enable machine-to-machine (M2M) connectivity using various wireless interfaces. It also provides an online application store for industrial things as a platform for developers to provision and manage their gateway and associated sensors and devices.

What's in the box

Your Developer Kit includes the following:

- Developer Board
  - 1 - MTCDT-Conduit Developer Board
- Power Supply
  - 1 - 100-240V 9V-1.7A Power Supply with removable blades
    - 1 - NAM blade/plug
    - 1 - EURO blade/plug
    - 1 - UK blade/plug
- Cables
  - 1 - Micro USB Cable
  - 1 - Ethernet Cable RJ45 6-ft.
- Antennas
  - Varies with Conduit model

What you need:

- Phillips screwdriver
- SIM card

To install or replace the SIM Card:

1. Disconnect power to the Conduit, if it is connected.
2. At the front of the Conduit housing, remove the screw that secures the nameplate to the housing and remove the nameplate.
3. At the upper right side of the opening, locate the SIM and its sleeve. If a SIM card is installed and needs to be removed, slide it out of the sleeve.
4. Gently push the new or replacement SIM card into the sleeve face up with the cut corner to the right and the SIM contacts facing toward the interior of the housing.
5. Reattach the nameplate to the housing using the screw removed in step 2.

What you need:

- Phillips screwdriver
- SD memory card

To install or replace the SD Card:

1. Disconnect power to the Conduit, if it is connected.
2. At the front of the Conduit housing, remove the screw that secures the nameplate to the housing and remove the nameplate.
3. Locate the SD card at the left side of the opening on the underside of the PC board. If an SD card is already installed, gently push on the card to release it from its setting and remove it from the housing with your fingers.
4. With the new SD card contacts facing up and toward the interior of the housing, gently push the card into the slot to secure it in place.
5. Reattach the nameplate to the housing using the screw removed in step 2.

Application Enablement model LEDs

A-B-C-D - These 4 LEDs are user-specified. Present on the Conduit mLinux model only.
Back Panel Connectors

MultiConnect

Slots for MultiTech accessory cards.

9-32 Vdc power receptacle for provided power cord.

High-speed, standard USB 2.0 Type A USB HOST connector.

9-32 Vdc power receptacle for provided power cord.

Quick Start Guide

Replacing the Battery

You need:

• Phillips screwdriver

• Non-metal tweezers or similar object

1. Disconnect power to the Conduit, if it is connected.

2. At the front of the Conduit housing, remove the screw that secures the nameplate to the housing and remove the nameplate.

3. The battery holder is located at the right side of the opening that secures the nameplate to the housing. Use non-metal tweezers as necessary to remove an existing battery.

4. Orient the new battery so that the positive (+) pole is facing down. Use your fingers or non-metal tweezers to insert the battery into the holder.

5. Reattach the MultiTech nameplate to the housing using the screw removed in step 2.

Additional Information

For additional regulatory information see www.multitech.net

47 CFR Part 15 - Regulation Class B Devices

The equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio communications, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.

• Increase the separation between the equipment and receiver.

• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

• Consult the dealer or an experienced radio/TV technician for help.

Connect the equipment into an outlet on a circuit different from that to which the user is authorized to operate the equipment.

Warning:

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
