

# mPower Edge Release 5.3.3 – API Delta

---

This document lists implemented changes to the mPower API for release 5.3.3 compared to 5.3. **NOTE:** The following information is subject to change without notice.

All the changes are marked **in RED**.

## Collections

Collections are groups of related elements used to configure a service or capability. There are four main actions that can be performed on a collection: get, edit, add, and delete. These actions align with RESTful calls: GET, PUT, POST, and DELETE.

The following new collection endpoint was added:

[resetButton](#)

## resetButton

Description: Contains the backup battery configuration parameters: OBJECT

Element	Type	Description
resetToFactoryDefault	BOOL	Enable the ability to reset the device to the factory default configuration by pressing the RESET button
resetToUserDefinedDefault	BOOL	Enable the ability to reset the device to the user-defined default configuration by pressing the RESET button
